EDUCATION

Fr. Conceicao Rodrigues College of Engineering
B.E in Computer Engineering (CGPA: 8.79)

2023 - 2027
Mumbai, Maharashtra

EXPERIENCE

CS Infocomm Private Limited

Jul 2026 – Present

Software Engineer Intern

- Developing a workflow automation platform using FastAPI, PostgreSQL, React, React Flow & LangGraph, with DAG-based workflow creation and execution
- Building agentic workflow nodes with LangGraph & ChromaDB, integrating retrieval and FastAPI-based serving for multi-step automation

Virtue Crennovative Solution

Nov 2025 – Apr 2026

Full Stack Developer Intern

- Developed end-to-end frontend and backend features for an e-commerce platform using Next.js, TypeScript & Node.js, owning features from implementation to delivery
- Designed SQL queries and data workflows for listings, orders and reporting, improving operational efficiency and data accuracy

PROJECTS

KickstartCrypto - Web3 Crowdfunding Platform [Live Demo](#) | [GitHub](#)

- Engineered a Web3 crowdfunding platform with automated payment workflows, real-time notifications, and user dashboards for transaction and campaign monitoring
- Implemented secure authentication and access control using PostgreSQL and Supabase, maintaining reliable user management and data integrity
- Built an administrative monitoring and reporting system with automated notifications and user activity tracking

AuthBlock - Blockchain-Based Academic Credential Verification [Live Demo](#) | [GitHub](#)

- Engineered a blockchain-based credential verification system using Next.js, PostgreSQL, Solidity, and Ethereum (Sepolia), supporting tamper-proof academic credentials across three smart contracts
- Implemented document verification workflows, cloud storage integration, and QR-based validation systems to ensure secure and accurate credential processing
- Built an administrative portal for bulk credential processing, tracking, and deployment workflows

SecuraAI - AI-Powered Multi-Agent Security Scanner [Live Demo](#) | [GitHub](#)

- Built an agentic AI security-scanning platform (FastAPI + LangGraph, Next.js) running four automated flows recon, header audit, injection testing, and SAST, as multi-node state machines with live SSE progress.
- Engineered a parallel SAST pipeline across five scanners (Semgrep, Bearer, OSV-Scanner, Gitleaks, CodeQL) with cross-tool deduplication, RAG-grounded LLM triage (Upstash), and auto-generated fix diffs.
- SPublished zero-dependency npm CLI (@authtrack/secura) delivering live scan progress and AI patch diffs in the terminal, no local scanner setup required

SKILLS

Programming Languages: C, C++, Java, JavaScript, TypeScript, Solidity, Python

Web Development: React.js, Next.js, Flask, Node.js, Spring Boot, FastAPI

Databases: PostgreSQL, MySQL

AI Engineering: LangGraph, ChromaDB, n8n, RAG

Tools and Platforms: Git, GitHub, Docker, AWS, MS Excel

Core: Data Structures & Algorithms, OOP, REST APIs

EXTRA-CURRICULAR & ACHIEVEMENTS

- Finalist | BitNBuild'25 Hackathon | GDSC CRCE ([Certificate](#))
- Finalist | S.P.I.T. Hackathon 2026 | S.P.I.T. ([Certificate](#))
- Technical Lead | TEDxCRCE | Led tech for the 100+ attendee main event and Internship Expo, building automated ticketing and QR validation; drove 3.1K+ impressions and 150+ clicks
- Scholarship Recipient | Mohan T. Advani Centennial Scholarship Programme | Awarded the Blue Star Scholarship for academic excellence, innovation, and overall performance
